

Syft

Describe your person. *Meet your match.*

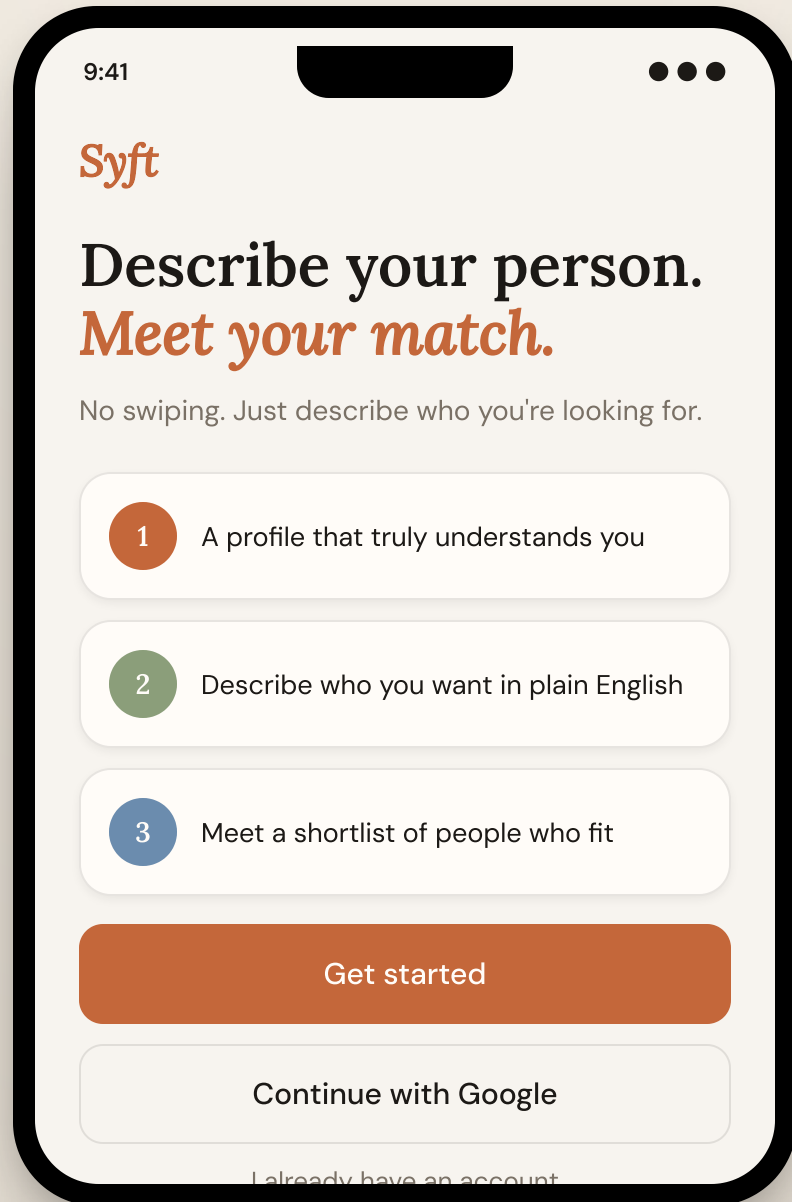

UI design deck — the search engine for human connection.
Calm, intelligent, intentional. No swiping.

Warm cream · terracotta accent

Lora + DM Sans

9 screens · mobile-first

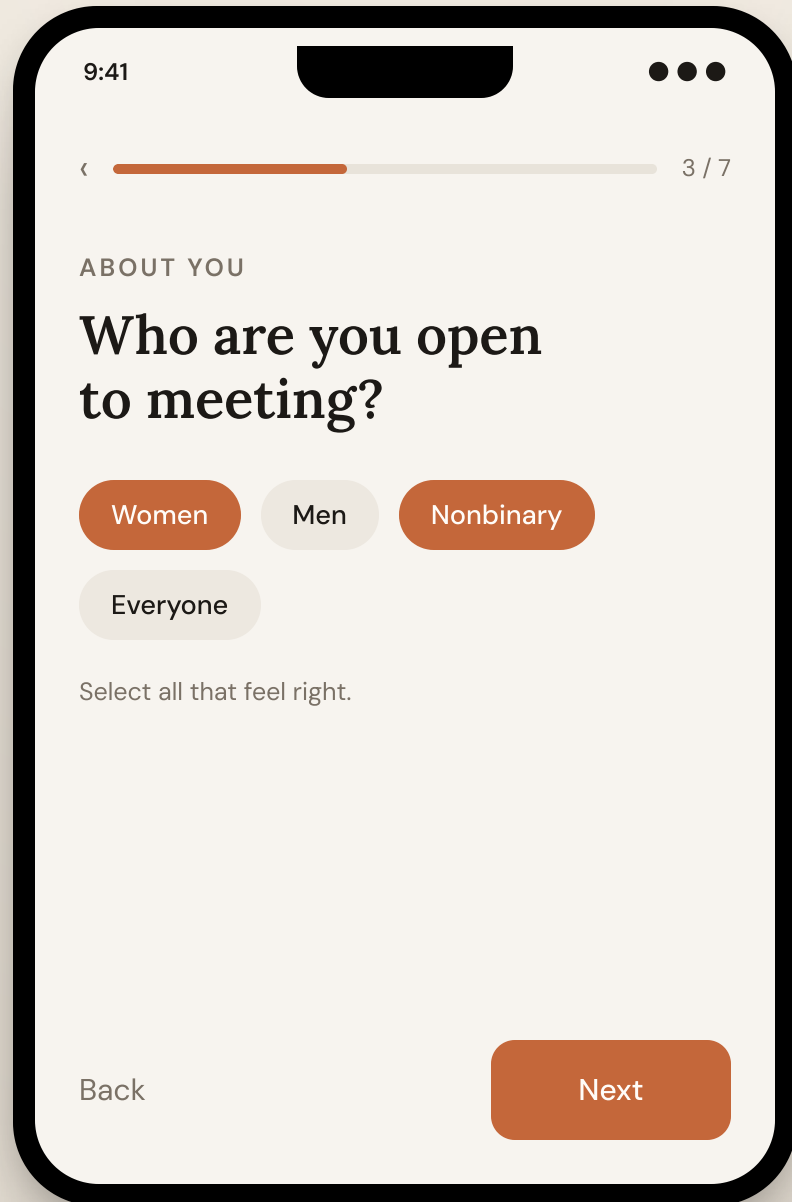

STAGE 1 · ONBOARDING

Set the anti-swipe tone

First touch establishes Syft as a thoughtful matchmaker, not a casino. Hero promise, then a 3-step "how it works" so people understand they're investing in a richer profile.

- Serif hero with the terracotta brand line
- Three calm cards preview the journey before signup
- Full-width primary CTA + quiet Google / sign-in options

ABOUT YOU

Who are you open to meeting?

Women Men Nonbinary

Everyone

Select all that feel right.

Back Next

STAGE 2 · ASSESSMENT

One question per card

Structured intake that feels light despite its depth — clean, comparable data for matching without a wall of form fields.

- Thin terracotta progress bar, one prompt at a time
- Tappable chips over typing; selected fills accent
- Sliders for distance & height; quiet Back / accent Next
- Set: age · location · gender · open-to · intent · distance · height

IN YOUR WORDS

Tell us about your perfect Sunday.

Slow morning, good coffee, a long walk somewhere green with nowhere to be|

Write naturally — there's no right answer.

◆ **A reflection:** you write with warmth and a calm, unhurried rhythm.

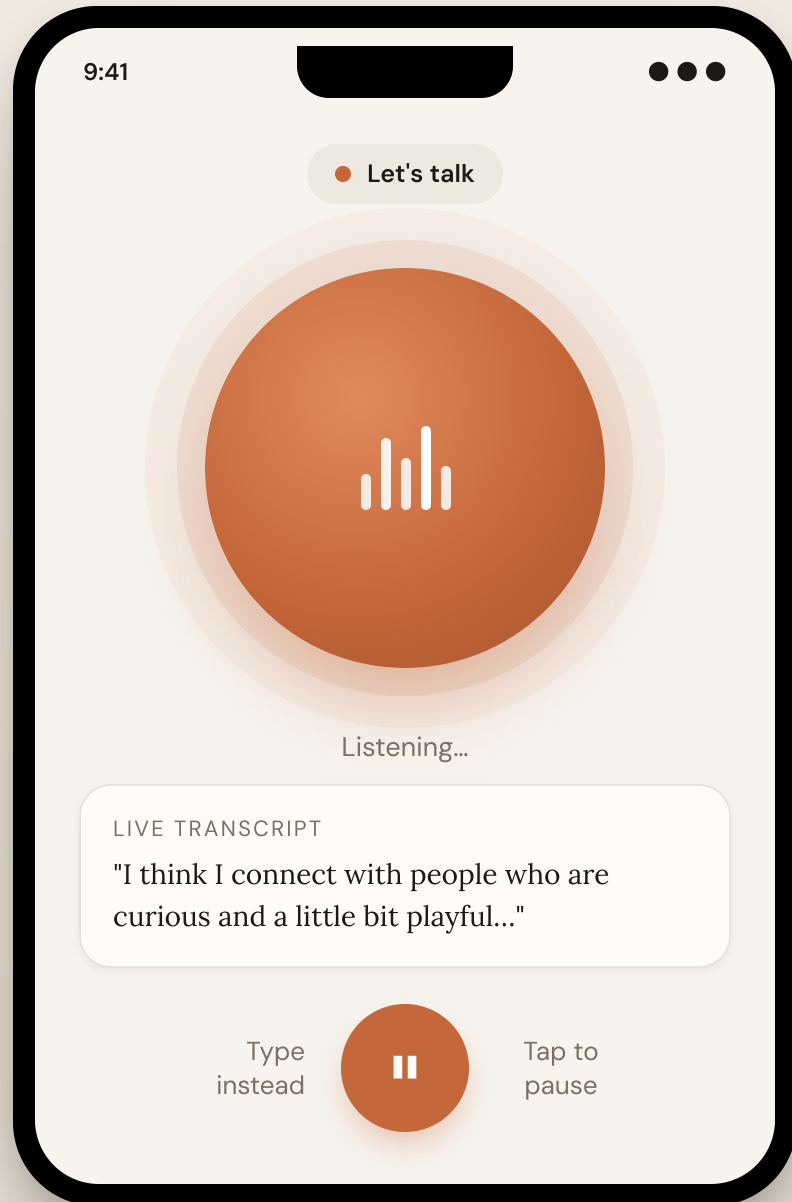

Continue

STAGE 3A · IN YOUR WORDS

Writing as signal

Free-text prompts feed the psycholinguistic read — how someone thinks and expresses themselves. The insight is shown back as a reward, framed as a reflection, never a score.

- Soft, borderless text area with a terracotta focus ring
- Light personality reflection card after submit
- Transparent: the user knows writing helps Syft understand them

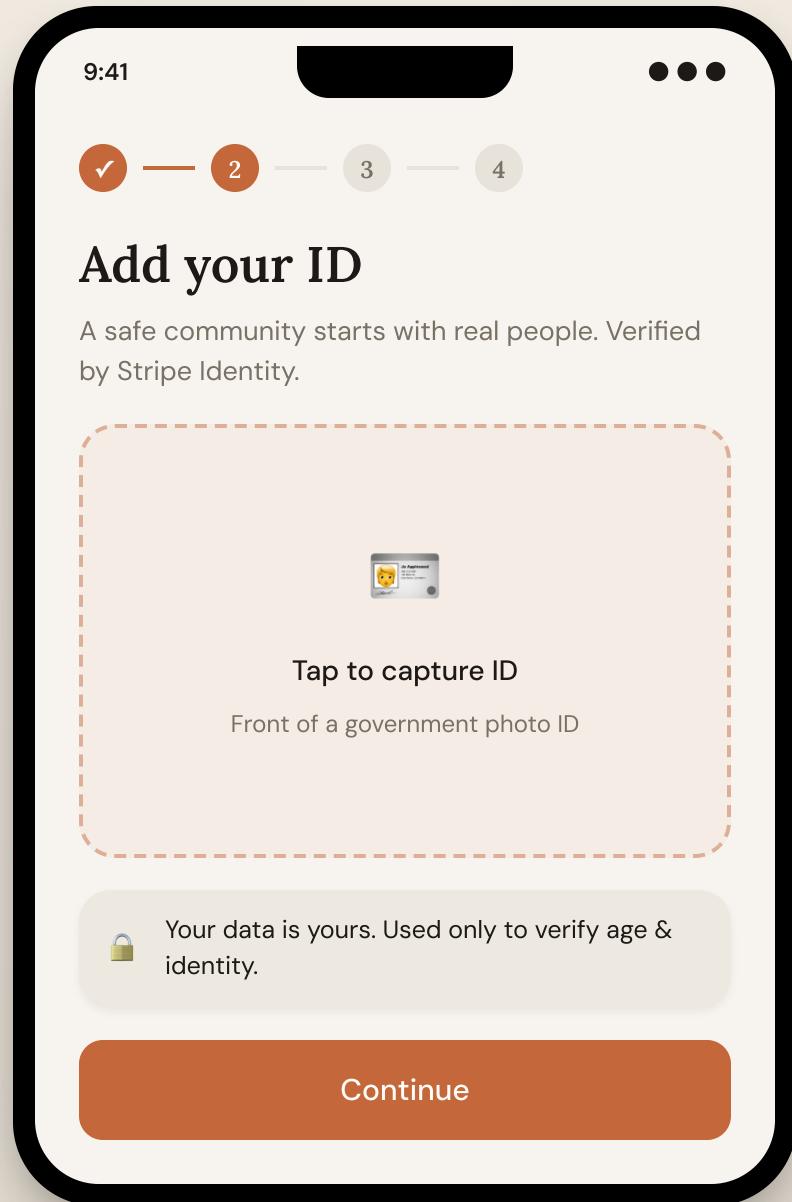

STAGE 3B · LET'S TALK

A calm voice conversation

A short talk with Syft's assistant captures tone, warmth and nuance checkboxes miss. Meditative and trustworthy, never flashy.

- Breathing terracotta orb; EQ bars while you speak
- Live transcript visible for trust & transparency
- Obvious "talking to Syft's AI" tag; clear tap-to-pause
- Typed fallback for accessibility

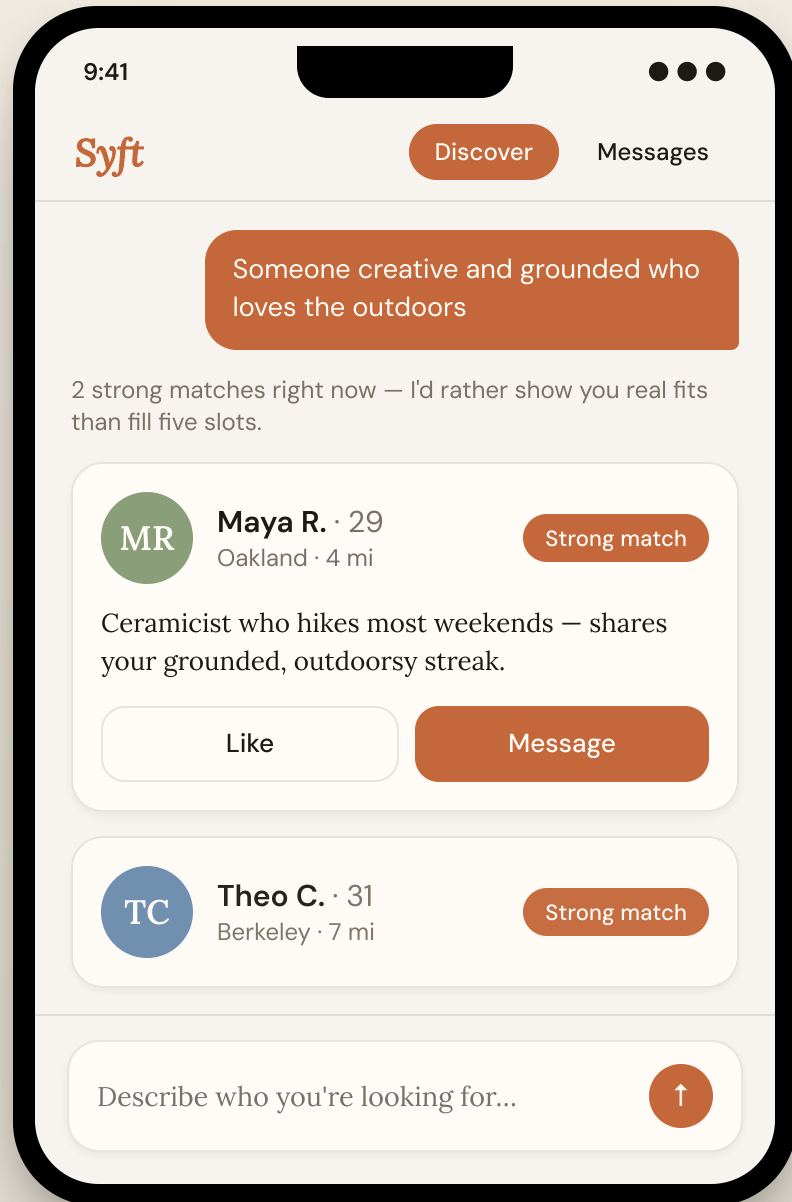

STAGE 4 · IDENTITY & SAFETY

The trust gate

A mark of a serious, safe community — not a bureaucratic hurdle. Powered by Stripe Identity, with age verification as a hard legal bright line.

- Numbered steps: intro → consent → ID → selfie → done
- Dashed capture zones; circular selfie guide
- "Your data is yours" privacy explainer up front

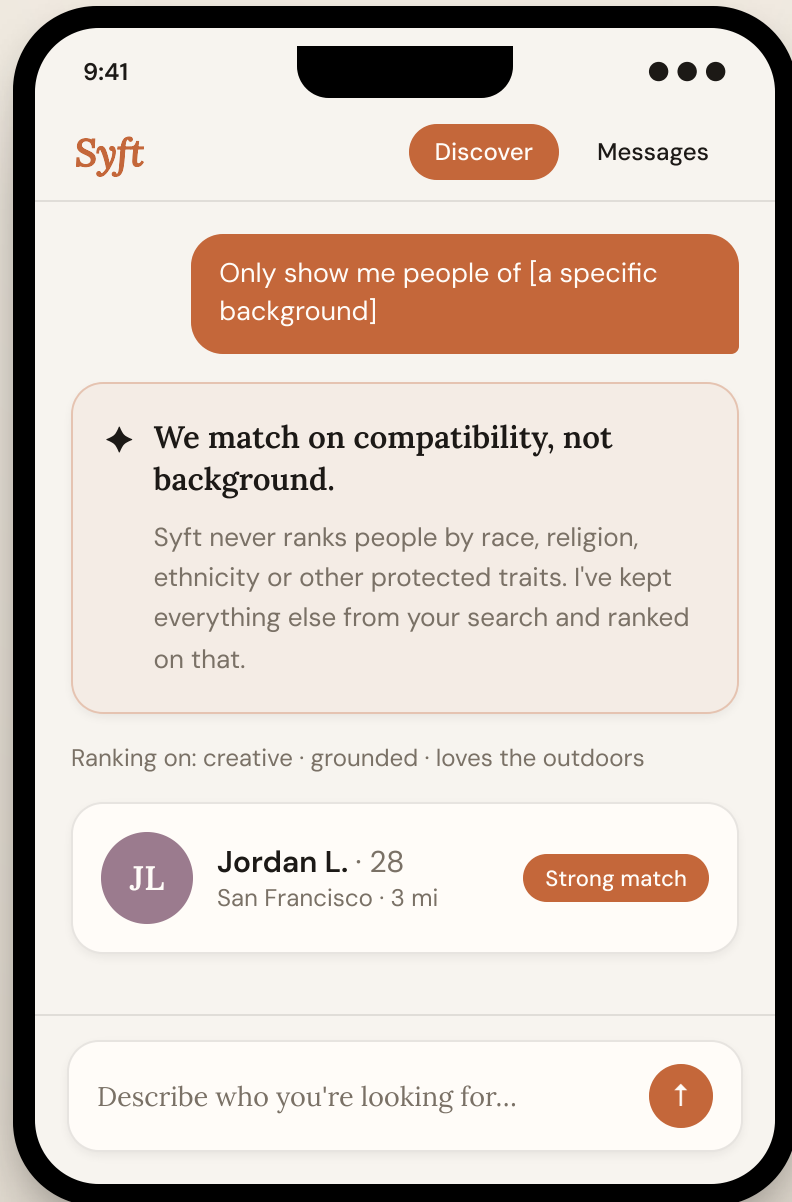

STAGE 5 · SEARCH PLATFORM

The hero experience

You describe who you want; Syft returns up to five rich match cards with a short "why you two fit." A calm conversation — never a swipe deck.

- Pinned composer with ghost prompt + example chips
- Match cards: avatar, name/age/place, quiet "Strong match", reason, Like / Message
- Confidence-honest: "2 strong matches right now," never padded to five
- Refuse-and-reframe state for protected-trait queries

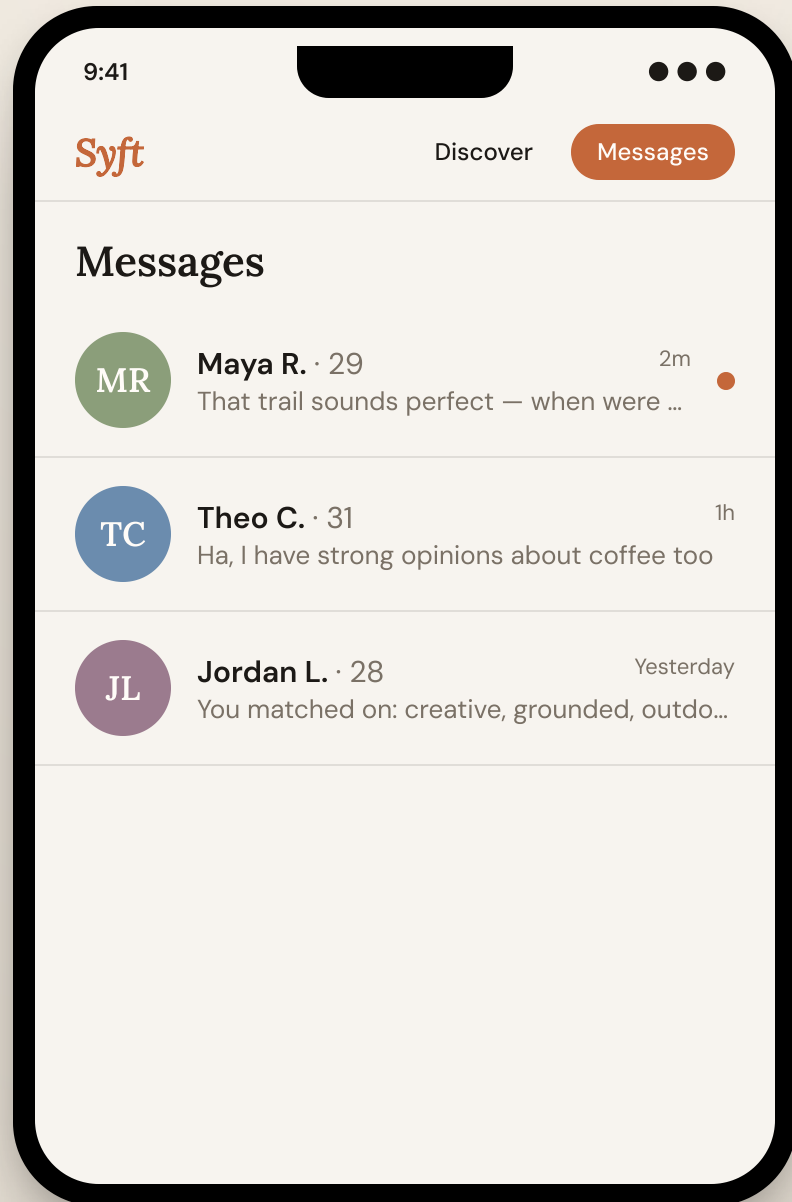

CRITICAL SUBSYSTEM · SAFETY

Refuse & reframe

When a query tries to filter on a protected characteristic, Syft calmly declines that dimension, explains the stance, and still ranks on everything else. It must never error out or feel broken.

- Warm inline note, not a red error
- Shows exactly which dimensions it *is* ranking on
- Results continue uninterrupted below

POST-MATCH · MESSAGES

Warm, human inbox

Where surfaced candidates become real conversations. The user is always in control — Syft never auto-messages.

- Calm rows: avatar initials, name/age, last-message preview
- Unread shown as a small terracotta dot, not a loud badge
- Chat window: accent outgoing bubbles + tappable "why you matched" recap
- Sustained conversation feeds the outcome-learning loop

REFERENCE · DESIGN SYSTEM

The system at a glance

One warm accent on neutral cream. Lora for voice & titles, DM Sans for everything functional. 12px radius, soft shadows, unhurried motion.

COLOR

-  Background · #f7f4ef
-  Card · #fffcf8
-  Secondary · #ede8e0
-  Accent · #c4673a
